DIFFUSER

Types of Diffusers:

- **Ceiling Diffusers:** Installed in the ceiling and are the most common type, distributing air across the room.
- **Linear Diffusers:** Used for long, narrow spaces and are usually installed along walls or in ceilings.
- **Floor Diffusers:** These are installed in the floor, usually for underfloor air distribution, and can help in spaces with raised floors.
- **Adjustable Diffusers:** These allow you to control the direction of the airflow, useful for directing air to specific areas.

Common Materials:

- Metal (usually Aluminium or steel)
- Plastic (more lightweight, sometimes used in residential settings)

GRILLES

Types of Grills:

- **Ceiling Grills:** Mounted in the ceiling and are often used in commercial spaces.
- **Wall Grills:** Installed in walls, commonly found near HVAC systems or in offices.
- **Floor Grills:** Placed in the floor, often used for radiant heat systems or venting.

Materials:

- Metal (steel, aluminium)
- Plastic

FILTERS

- Synthetic
- Fiber glass
- HEFA
- Aluminum Frame
